

GOLDIE-21

High Penetration
Low Cost GPR
Detector

Goldie21 is designed from the start to be an easy to deploy, lightweight GPR detector for medium to high penetration depths

The WiFi connectivity and internal batteries makes this unit ideal for use when cables are in the way of surveys or can get tangled with tree branches or leaves

The unit can be configured in three different frequencies, 50, 100 and 250MHz which allows for a wide range of applications

The unit was conceived with treasure hunter users in mind and provides all the necessary features to remain usable in a variety of tough conditions

Dimensions
339x403x165mm

Weight
4.45kg

Penetration depth
60m/>20m/>6m

External power supply
15.0VDC 2A

Bandpass Filter, Background removal, Stacking

Can detect voids
